

Project Development Phase

User Acceptance Testing (UAT) Template

Date	01 October 2026
Team ID	SWTID-2026-7951
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	

The supplied UAT template includes project overview, testing scope, environment, test cases, bug tracking and sign-off. It specifically asks that positive and negative scenarios be covered. [filecite\turn4file7\L7-L18](#) [filecite\turn4file7\L50-L59](#)

Project Overview

Item	Project-specific details
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Project Description	A ServiceNow script-controlled ACL restricts record viewing according to the Branch field. EEE users can view EEE records, while administrators retain full access.
Project Version	v1.0
Testing Period	01 October 2026 to 24 October 2026
Testing Scope	User authentication context; EEE record access; unauthorized non-EEE access; administrator access; Branch-field conditions; denial behaviour; consistency; basic performance.
Requirements / User Stories	USN-1 through USN-8 from the project planning phase, especially EEE access, non-EEE denial, administrator access and ACL validation.
Testing Environment	ServiceNow development/lab instance; target table and scripted ACL configured for the project.
Credentials	Use designated test accounts only. Do not record real passwords in this document.

UAT Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	EEE user views EEE record	1. Log in as EEE user. 2. Open EEE record. 3. Verify record details.	EEE record is displayed.	To be filled	PASS / FAIL
TC-002	Non-EEE user attempts EEE record	1. Log in as non-EEE user. 2. Open EEE record.	Access is denied.	To be filled	PASS / FAIL
TC-003	Administrator views EEE record	1. Log in as administrator. 2. Open EEE record.	Record is displayed.	To be filled	PASS / FAIL
TC-004	Administrator views other-branch record	1. Log in as administrator. 2. Open non-EEE record.	Record is displayed.	To be filled	PASS / FAIL
TC-005	EEE user attempts non-EEE record	1. Log in as EEE user. 2. Open non-EEE record.	Access follows the configured EEE-only restriction and does not expose an unauthorized record.	To be filled	PASS / FAIL
TC-006	Invalid/missing Branch	1. Select record with empty/unexpected Branch. 2. Test normal user. 3. Test administrator.	No unintended restricted access for normal user; administrator behaves according to policy.	To be filled	PASS / FAIL
TC-007	Repeated authorization check	1. Repeat an access attempt. 2. Compare results.	Decision remains consistent.	To be filled	PASS / FAIL

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	To be recorded if an ACL rule grants or denies access incorrectly.	Record exact user/role, record Branch value and access steps.	Low / Medium / High	Open / In Progress / Closed	Enter corrective action and retest result.
